

Jan Wisgerhof

PHP & Full stack developer (Senior)

15 Finnigan Street, Augustine Heights, QLD – 0488 198 485 – <http://www.wisgerhof.io> – jwwisgerhof@gmail.com

About me

I am an end-to-end software developer mainly focusing on the web. My experience ranges from developing small static websites to large corporate applications. Proficient in full stack development, I bring a wealth of knowledge to any software project.

In my free time I love to spend time with my two kids (Dante & Evan), playing chess, field hockey and any PC game. As long as there is challenge to something you will find me interested.

Employment history

Senior Developer

- + Various large projects, including the library UQ SSO integration
- + Test driven development (Protractor, WCT, Behat)

Education

Master of IT – Major in eCommerce

2007 – 2008

GPA: 6.25 out of 6.5

Bachelor of IT – Minor in AI

2003 – 2007

GPA: 6 out of 6.5

Skills

I have worked with hundreds of technologies over the last 10 years. I absolutely love technology and will investigate each language, framework and/or best practice I hear about. I generally pick up new languages very quickly, and am lucky to have a general understanding of most modern languages. Skills I have particularly focused on in recent years are **PHP, AngularJS, Polymer** and various **automated deployment strategies**. Some other things I have done recently:

Laravel	Lumen	Slim	Silex	Symfony
PHPUnit	Behat	Protractor	WCT	Polymer
AngularJS	Angular Material	GIT	REST API	CloudFront
SASS	Twig	Blade	Kendo	PSR
Knockout	TypeScript	MySQL	MsSQL	AWS
